

NEW TECHNOLOGIES AND CONSOLIDATION SHAPE OUTLOOK FOR TOP LABS

VM'S 20TH ANNUAL REPORT TRACKS IMPACT ON LARGEST WHOLESALERS

TOP LABS
VM 2012

BY ANDREW KARP / GROUP EDITOR, LENSES + TECHNOLOGY

NEW YORK—To the casual observer, little has changed in wholesale optical laboratories over the past two decades. The essential lab functions—fabricating prescription eyeglass lenses, selling eyeglass frames, contact lenses and other optical products and services—continue to be performed by most labs every day. Job orders are still being processed, and lenses are still being surfaced, coated, edged, inserted into frames, inspected and shipped to customers.

Yet sweeping changes have taken place in wholesale labs since 1992, the first year *Vision Monday* published its Top Labs Report, as anyone who has worked in or closely watched the optical industry in recent years can attest. Advances in lens processing technology—most notably increased automation and the advent of free-form lens surfacing—have brought greater efficiencies to lab operations and boosted labs' profits. Additionally, widespread consolidation resulting from numerous mergers and acquisitions has created large, supplier-owned wholesale laboratory networks that continue to grow and have radically redrawn the competitive "landscape" over the past two decades.

These two forces—automation and consolidation—continue to shape the outlook for the industry's largest wholesale laboratories, according to *VM's* 2012 Top Labs Report. Conducted annually

by *VM*, the newly released report compares net sales, Rx sales, Rx jobs per day and other key indicators for the 12 months ending August 31, 2012 with data from the prior 12 months and 1992.

Among the Report's key finding is that combined net sales for the Top Labs, including both supplier-owned lab networks and the independent labs, reached a record \$2,303 million in 2012, up 4.1 percent from 2011. Rx sales for the Top Labs—the primary criterion for ranking them—totalled \$1,957.5 million collectively, up 4.4 percent over 2011. The Top Labs produced a total of 133,692 Rx jobs per day, or roughly 33.4 million Rx jobs annually, a 2.5 percent increase over last year.

Top 5 Supplier-Owned Networks

The past 12 months were especially productive for the Top 5 Supplier-Owned U.S. Wholesale Lab Networks. Collectively, the Top 5 generated \$1,710 million in total net sales, up 5.7 percent over 2011. Total Rx sales, which is based on the labs' core business of surfacing and finishing prescription lenses and is the primary basis of the Top Labs rankings, totaled \$1,532.1, a 6.6 percent increase over 2011. Rx lenses sales comprised 92 percent of Total Net Sales for the Top 5 Labs, flat with 2011.

The number of Rx jobs per day for the Top 5

climbed to 102,900, up 3.2 percent over 2011. The average proportion of uncut lens jobs among the Top 5 is 35 percent, flat with 2011. The Top 5 currently operates 192 individual lab locations, one more than in 2011. The Top 5 work force consists of 9,414 employees, up 3.2 percent from last year.

The Top 25 Independents

On an individual basis, some independent labs made gains in 2012. Collectively, though, the performance of the Top 25 Independent Labs declined slightly from 2011. Total aggregate net sales for the Top 25 Independents in 2012 is \$593.1 million, a 0.7 percent decrease over 2011. Total aggregate Rx sales for the Top 25 fell to \$425.4 million, down 3.4 percent from 2011.

Rx sales accounted for 92.1 percent of net sales for the Top 25, down 1.7 percent from 2011. Unit sales among the Top 25 shrank to 30,792 Rx jobs per day, down 3.5 percent from 2011. Uncut lenses, on average, accounted for 36.4 percent of Rx jobs produced by the Top 25, up 11.3 percent over 2011.

The total number of lab locations operated by the Top 25 decreased to 75, one less than 2011. The size of the Top 25 labs' work force decreased 8.2 percent from 2011, to 2,564 employees.

VM's Top Labs Performance Analysis

VM's Top 5 Supplier-Owned U.S. Wholesale Lab Networks

	2012 (\$millions)	2011 (\$millions)	% change
Total Net Sales	\$1,710.0	\$1,612.0	+5.7%
Total Rx Sales	\$1,532.1	\$1,430.7	+6.6%
Avg. Rx Sales as Percentage of Total Net Sales	92.0%*	91.7%*	+0.3%
Total Rx Jobs Per Day	102,900	99,600	+3.2%
Avg. Percent of Uncuts	35%	35%	0%
Total Number of Lab Locations	192	191	+0.5%
Total Number of Employees	9,414	9,119	+3.2%

VM's Top 25 Independent U.S. Wholesale Labs

	2012 (\$millions)	2011 (\$millions)	% change
Total Net Sales	\$593.1	\$597.3	-0.7%
Total Rx Sales	\$425.4	\$439.9	-3.4%
Avg. Rx Sales as Percentage of Total Net Sales	92.1%**	93.7%**	-1.7%
Total Rx Jobs Per Day	30,792	31,876	-3.5%
Avg. Percent of Uncuts	36.4%	32.3%	+11.3%
Total Number of Lab Locations	75	76	-1.3%
Total Number of Employees	2,564	2,774	-8.2%

Rx Sales represent the majority of revenue for most of the Top Labs. However, the following are exceptions, and therefore were not included in calculating the Average Rx Sales as a Percent of Total Net Sales:

*Does not include Nassau Vision Group Laboratories, which has Rx sales of 26 percent; remaining 74 percent of Nassau's Total Net Sales is from stock lens business.

**Does not include Walman Optical or Diversified Ophthalmics, which have Rx sales of 46 percent and 47 percent respectively. Remaining percentage of Walman's and Diversified's Total Net Sales are from various other products and services.

How the Big Wholesale Labs Measure Up in 2012

Continued from page 39

A 20-Year Lookback

Comparing VM's Top Labs of 1992 to today's Top Labs clearly illustrates the scope of change in the wholesale lab sector. For example, in 1992, VM's Top 25 labs, all of which were then independently owned, generated about \$533 million in sales. In 2012, VM's Top 25 Labs—now including both supplier-owned and independently owned labs—are expected to generate approximately \$1.6 billion in sales, a 67.5 percent increase. In 1992, the Top 25 processed about 50,000 Rx prescription jobs daily; this year, they are expected to produce approximately 132,034 Rx jobs per day, a 62 percent increase over 1992. These dramatic shifts are being driven by automation and consolidation.

Increased automation in prescription lens processing has resulted in greater efficiencies. In particular, the broad implementation of lab management soft-

ware to control all of a lab's operations, plus the growing use of automated conveyor systems has significantly boosted productivity and profits. Additionally, the introduction of free-form surfacing technology, which sharply reduces inventory and eliminates time-consuming production steps, has further increased the bottom line for many labs. As these technologies have more affordable and scaled-down systems have become available, a growing number of labs have taken advantage of them.

Consolidation, the other major force influencing the wholesale lab sector, began in 1996 when Essilor, the industry's largest spectacle lens supplier, launched a vertical integration strategy and acquired three major U.S. independent distributors: The Omega Group, Southern Optical and Duffens Optical. The three companies ranked among the VM's five biggest Top Labs, and each operated multiple locations.

Essilor pursued its acquisition strategy for the remainder of the 1990s and throughout the 2000s, and is continuing to do so today. The company currently operates 136 lab locations throughout the U.S.

Its two largest competitors, Hoya Vision Care and Carl Zeiss Optical, have followed suit. Hoya currently operates 24 branches, and Zeiss operates 18 branches.

Out of VM's original group of Top Labs in 1992, 13 have been acquired by Essilor, three have been acquired by Hoya and one has been acquired by Zeiss. One of the original labs is defunct; the other seven remain independent (see chart, page 42).

By establishing large U.S. lab networks over which they exert central control, these three lens suppliers have improved efficiencies and productivity within their networks while increasing the penetration of their own branded, premium lens products. ■

Top Labs in the News

NEW YORK—2012 has been a busy year so far for several of VM's Top Labs.

The year got off to a fast start in early January, when Essilor International announced it had acquired CSC Laboratories, which ranked number two in VM's 2011 Top Labs Report. The purchase price was not announced.

Based in Watsonville, Calif., CSC Laboratories was owned by the Kim family, which retains a minority share. The company is headed by D.K. Kim, who founded the company in 1967. CSC Laboratories also operates a branch in San Jose, Calif.

Essilor also announced in January that it had acquired Professional Ophthalmic Laboratories in Roanoke, Va.

Also in January, VSP Global acquired a majority interest in two wholesale prescription laboratories that it owns in partnership with Carl Zeiss Vision: Perfect Optics in Vista, Calif. and CZV Florida in Clearwater, Fla. The Perfect Optics transaction involved VSP buying out shares of the company owned by individual members of its management team. Perfect Optics was ranked as the 16th largest U.S. independent wholesale lab in Vision Monday's 2011 Top Labs Report.

With the ownership shift at CZV Florida, the lab has changed its name to Zeiss/VSP Lab, Tampa

Bay. Carl Zeiss Vision retains a minority position in both Perfect Optics and CZV Florida.

In April, Essilor announced that it acquired a majority interest in Optic Blue, a prescription laboratory based in Lubbock, Texas. Optic Blue ranked 25th among U.S. independent labs in VM's 2011 Top Labs Report.

In May, Essilor acquired a majority interest in Central Optical in Youngstown, Ohio. Owner Lloyd Yazbek retains a share of the company which generates \$11 million in annual revenue, according to Essilor. In a related development, Yazbek and his wife, Linda Yazbek, purchased a minority interest in Optical One, another Youngstown-based whole-
